# Mint token & configure tokenomy

CloudStudio lets everyone mint tokens, no coding knowledge required. Just sketch the tokenomic, such as the burnability, mintability, and interaction with other tokens, and then create your own token with a few clicks. There are wide range of tokens available, including utility tokens, deflationary tokens, tax or charity tokens, and incentive tokens.

Project Owners can also promote their tokens by adding their project profiles to our public library, verifying them, and using marketing boosting services.

The logo for NFT CLOUD features the word "NFT" in pink and "CLOUD" in yellow, both in a bold, bubbly font. The text is set against a white, fluffy cloud background with a blue outline.

**NFT  
CLOUD**

The title "Token Launcher" is written in a large, bold, yellow font with a dark blue drop shadow, set against a bright blue background.

# Token Launcher

Our CloudStudio offers a variety of solutions for the various sales types. Just a few clicks are all it takes to set up your token sales, with no due diligence hassle, and the smartest contracts which subjected to rigorous testing and auditing.

# Liquidity Controller

The solution to avoid snipebots and the other errors that might occur in the listing event – CloudStudio gives Product Owners the ability to easily plan out the listing events in advance, so all they have to do is sit back, relax, and let things unfold as they should.

Everything is ready with only a few clicks, including adding liquidity at the appropriate moment, appropriately distributing tokens to investors, protecting against snipebots, and plenty more.

The logo for NFT Cloud features the words "NFT" and "CLOUD" in a stylized, bold font. "NFT" is in pink and "CLOUD" is in yellow, both with black outlines. The text is set against a white, fluffy cloud background.

**NFT  
CLOUD**

# Bulksender

Large-scale token distribution via conventional P2P methods typically is time-consuming, error-prone, and may increase gas fees due to transaction requests. NFTCloud solves these problems by batching token transfers per transaction and sending them in bulk, with optimized smart contracts which let users transfer tokens to thousands of receiving addresses at the lowest gas fee.

# Token locker

You need a secure place to store your digital assets, a reliable way to transfer locked tokens, or to build community trust by keeping liquidity tokens untouchable?

The CloudStudio's Token Locker can secure single/LP tokens, with vesting mechanism available. Users can use their tokens or NTF as a mortgage and generate liquidity by transferring ownership to another wallet while they're locked in the vault

NFT Private  
Marketplace

# NFT Minting

**NFT Minter supports a variety of NFT types and sizes to be created across multiple blockchains, with the minimized minting cost brought by optimized minting smart contracts.**

NFTs can be issued as single, standalone entities or generative sets with multiple attributes, with limited or unlimited edition and collection sizes. Users can use self-service tools to upload, verify, and add metadata to each file, and also can generate a random combination of specified features or attributes to apply while minting NFTs.

# NFT airdrop & sales

It is now easier than it has ever been before to make the pieces in your art collection available to the general public.

NFT Launcher gives users a broad variety of choices to choose from in order to cater to various categories of sales.

Just a few clicks before you are ready for your first NFT collection sales on blockchain.

# NFT marketplace

For Product Owner who wants to build a private marketplace tailor-made for their own community that supports exclusive filters and meet special requirements, you can use our tools to make it come true. Just register the project, fill your requirements in the setting, and your desired result would be brought to life by CloudStudio.

# Project Hub

## News Center

News center aggregates news from users' preferred sources and displays it on their devices as soon as it's published.

Users can change their settings at any time.

VIP users, such as NFTCloud Collection holders, have access to many additional features, including personalized content filters and premium news sources.

## Customized Alert Bots

A feature that automates several tasks for you, such as sending you alerts when certain conditions are met, keeping track of your money, and trading automatically.

VIP users can also create unlimited alerts with more customization options.

## eKYC

NFTCloud's eKYC ensures project authenticity while protecting the privacy of Project Owners. The project owner is required to submit personal documents to an automated platform, which verifies the data via a network of identity verification partners. If there are allegations that the project is rife with fraud or scams, we will share such information with the proper authorities.

# Unleashing the values of your NFTs

**Staking  
for passive income**

**Revenue  
sharing**

**DAO  
voting**

**Discount on  
tool & service fees**

**Exclusive  
perks**

# Staking for passive income

After purchasing the NFT, the owner of the NFT have full ownership over it.

The owner can keep the NFT in their inventory or stake them in the Vault to receive stable coins, tokens, rare NFT items, and bonus rewards. We also offer various reward boosters for Collectors who stake large quantity of NFTs.

# Revenue sharing

50% of the platform's generated fees will be stacked in a Treasure to be distributed to NFT owners in the form of monthly reward.

Distribution rate depends on the number of NFT owners and on the number and rarity of the NFTs that each owner holds.

# DAO voting

As a decentralized autonomous organization, we leave a large part of our platform ownership in the hands of our NFT holders through DAO voting, which allows owners of NFTs in our Collection to propose platform developments and help our organization achieve mutual goals.

# Discount on tool & service fees

Registered users who owns our NFTs will be entitled to regular and occasional discounts to apply when they are in need to use our tool and services.

# Other perks

Owner of our NFTs will be entitled to early access to new project, new listing, upcoming events announcements, as well as many other perks in terms of information.

Besides, they are also able to receive bonus APR from our partners.
